## Dow Corning Construction Industry 2009 Technical Training Academy

Dow Corning Construction Industry is providing Technical Training Academy with the objective to enhance silicone sealants capabilities and share our more than 30 years experience in sealant applications. As part of our continuous improvement process, we have used participant's feedback over the last years to upgrade the overall training content.

Dow Corning Technical Training Academy is offered to all Dow Corning customers, distributors, specifiers, architects, system designers or consultants who may identify benefits in participating in such class. Priority will be granted to our Quality Bond members ([www.qualitybond.com](http://www.qualitybond.com)). Class size is limited for convenience reason (16 participants/session).

Technical training sessions will be provided in English, French, Spanish and German on a two days basis by your Dow Corning Technical Service Engineers.

Training sessions will include the following topics:

- Silicone Chemistry, Important Sealant Properties and Sealant Test Methods.
- Structural Glazing Technology - History, Design, Products, Performance and Standards.
- Insulating Glass Technology - Design, Products, Performance and Standards.
- Project Management and Quality Control procedure.
- Dow Corning Quality Bond® Program presentation.
- Dow Corning Seneffe Laboratory: From theory to application.
- Building Envelop Weatherproofing - Design, Products, Performance, Standards, Application and Quality Control.
- Thermal Performance of Curtain Wall & Windows and Doors.
- Dow Corning e-support: learn our e-tools.
- Sealant Supply Chain Overview: Production tour with guide.

Please note that Technical Training Academy sessions are scheduled for the following dates, location and languages for 2009:
